Introduction to 15 ways to catch your spouse cheating

The tips you will find in the publication on how to catch a cheating spouse are some of the highest powered and advanced methods private investigators use to trick and catch infidelity in relationships.

None of the 15 methods to catch cheating in this guide are dependant on any other methods. So you can employ one tip or trick or all 15. The more of them you employ the more power you have and the faster you will catch cheating.

Each of these 15 tips will be graded in terms of its power and effectiveness for catching and proving infidelity as well as be given a grade in terms of how much it costs to use that specific method for catching infidelity.

One resource for catching a cheater that is repeated over and over is a company called [Brickhouse Spy Tools](#). This is essentially THE place to visit if you want spy tools to catch a cheater. They have everything you could imagine in your wildest dreams to help you catch a cheating husband or wife. James Bond shops here.

Stick with those methods first to hasten the process of determining if infidelity is in fact happening in your life.

All links in the publication open in a new window so as to not cause you to lose your place or to have to fumble with the back and forward button.

Unfortunately, statistics are not on your side but one thing to remember is there are plenty of relationships in which a person is wrongly and unjustly blamed for and accused of infidelity.

Here is hoping your relationship is one of those.

[1] Tip to catch your spouse cheating - Keep you mouth shut

Power to prove infidelity: [A]

Cost to prove infidelity with this method [A+] free

[Table of contents](#)

This first way to catch a cheating spouse is not really a way to catch a cheating spouse but even more important it is actually a rule you must remember at all costs no matter which ways to catch a cheating spouse you choose to employ:

Never ever, under any circumstances, reveal to the person you think may be cheating on you that you think they may be cheating on you.

Never let them know you suspect anything. The reason why is this will merely cause your cheating wife or husband to be more cautious about their infidelity which will make your job of catching them that much harder.

A huge part of your job of catching infidelity in your relationship or marriage is reducing the amount of... stealth the cheating exercises in their cheating behavior.

If you make them feel and think like they are getting away with the cheating scott free, their behaviors regarding interacting with the person they are cheating with will become more lax.

This makes a huge difference in how easily and how quickly you can get proof.

Remember rule number one when applying all the methods of catching a cheating spouse – play dumb.

[2] Tip to catch your spouse cheating – take a DEEP look at his past

Power to prove infidelity: [B-]

Cost to prove infidelity with this method [A] \$40-\$50

[Table of contents](#)

A lot of people look at me funny when this idea is brought up because the usual reaction is “*of course I know my spouse, I have been married to them for x number of years*” to which I reply “*so when you married him did you think he would be the type to cheat on you?*”

Nobody knows anyone as much as they THINK they do. Most of us keep the dark shadows hidden from others, even the ones we think we are most close to and a cheater usually has darker shadows than most others.

This particular tip on ways to catch a cheating spouse is not specifically a tip on how to catch somebody cheating but more about how to find out if they are more likely or more at risk to be someone who would cheat on you.

For example somebody who commits infidelity in a relationship indicates a serious moral deficit.

This type of person who would cheat or cheat on you is also the same type of person who would lie about serious things in his life and his past and the present.

Here is the danger to you... Nowadays people get married sometimes much too hastily. You are at this website not only to find out if your spouse or boyfriend or girlfriend is cheating on you but you are also coming here to find out the truth.

Before you proceed further you need to ask yourself this question — are you really, really, sure you are ready to find out the truth.

If you are married or in a serious long-term relationship you may think to yourself that something like this is totally unnecessary.

You may think to yourself something along the lines of *'I have been in a relationship with him or her for X. amount of years, I already know who they are'* and yet you are here at this website to find out if this person you are sure you know and trust is cheating on you.

You might want to look up the word [oxy-moron](#).

For what I am suggesting here is that you subscribe to the services of a serious and professional background checking service. **You may be seriously shocked with the information you might find.**

Remember if in fact your significant other is cheating on you then it is highly likely that their background is considerably different from the picture they paint to you.

Just remember what I warned you about make sure you are ready to find the truth no matter what it is. Just remember no matter how painful or shocking the information you find out is it is better to know the truth sooner.

One famous quote that Dr. Phil repeats over and over again that I love – he says *the only thing worse than being in a bad relationship for one year is being in a bad relationship for one year and one day*. As they say the truth shall set you free.

On the Internet there are tons of bogus background checking services that just take your money and provide you with the information their outdated and shoddy databases have. Stick with the couple I mention below.

The background checking services below our investigation services first and websites second versus the other way around.

- [Instant Background Reports](#) – 60 day satisfaction and guarantee of accuracy
- [E-Find-Out-The-Truth](#) – you background check done by a real P.I.

If you stick with those to the results will not only be legit they will be thorough but accurate as well.

[3] Tip to catch your spouse cheating – Cell Phone Spying

Power to prove infidelity: [A+]

Cost to prove infidelity with this method [A] \$50-\$100

[Table of contents](#)

This way to catch a cheating spouse is without a doubt one of the most effective and *most powerful ways to catch any sort of infidelity.*

Install a cell phone spying program to your spouse's mobile phone. A [cell phone spy tool like SpyBubble](#) is very inexpensive (about \$60).

All is required is that your spouses cell phone is a smart phone like a [Blackberry](#), [Symbian](#), [Android](#), [iPhone](#), or [Windows Mobile](#). Once installed you will be able to see...

- Every single phone call made and received with the cell phone including the time and length of the call as well as all the phone numbers of calls made and received
- [Spy on every single text message](#) sent and received including the time, the phone numbers text messages come from and are received from, as well as the exact text message word for word.
- Full and unrestricted access to your cheating spouse's cell phone book contact list.
- Built in GPS tracking will record everywhere your cheating spouse goes which is viewable on a map.

You also need to get a hold of your spouse's cell phone one time for about 5 minutes (like when he/she is in the shower).

When you sign up for cell phone spy they give you a username and password to your members area and a link to the spy program which is a small file.

You download the spy program to your spouse's cell phone and you're done. It runs totally invisible to him (he will NEVER know it is there).

These cell spy tools are really cool and effective.

Here is a list of a few of the most popular and best ones:

- [Spy Bubble](#) – \$59 one time with never a recurring fee and the ability to spy on an unlimited number of cell phones forever.
- [Spouse Spy](#) – \$79 for one year – most often the popular choice for detecting infidelity.
- [MobileSpy](#) – \$ 49 for 2 months, \$99 for one year.
- [FlexiSpy](#) - fairly expensive but has very powerful and advanced cell spy technologies no one else has like the ability to turn your spouses cell phone into a bugging microphone and the ability to be notified and silently patched in to any phone conversations your cheating wife or husband is having.

They have different features, options, and prices so take a look and choose the one that is right for you.

[4] Way to catch your spouse cheating - Place a tiny GPS location tracking device hidden in their car

Power to prove infidelity: [A-]

Cost to prove infidelity with this method [B] \$200-\$250

[Table of contents](#)

Hide a [GPS tracking stick](#) device in your *cheating spouse's car*. These are small 'catch cheater devices' are about the size of a cigarette lighter.

They will work on a single charge for about 4 days. This is another catch cheater piece of technology by [Brickhouse](#)

[Spy Tools](#).

Using GPS satellites this device will store *every single location your cheating spouse's car goes*.

You can later retrieve the device and see everywhere your spouse has gone. This GPS tracking stick works anywhere on the planet.

Its traveled locations can be shown... via a red line that is traced on satellite photos and 3D terrain using the latest mapping technologies from Google earth.

When you're ready to view your GPS location data, just plug the USB key Track-stick into your computer and quickly download all location information.

No monthly fees Ever

You will know EVERYWHERE your cheating spouse goes and WHEN they go there. No more lies here!

Continuously records its exact route, stop times, speed, direction, and other valuable information, all of which can be quickly downloaded and viewed on your computer.

It even has its own temperature recorder to help monitor the surrounding environment. A vibration detector, combined with proprietary low-power GPS technology, helps to make this an ideal energy-saving GPS device.

[5] Way to Catch your Spouse cheating – Make your Mom get Sick

Power to prove infidelity: [A]

Cost to prove infidelity with this method [B] cost varies

[Table of contents](#)

Create an excuse to go away for several days ... perhaps a sick mother or business trip?

Your cheating spouse will see this cheating opportunity like a teenager whose parents have gone away for several days (if going away for a few days is not possible you could just take up a night class at a local college to give him this 'away time').

In this setting your husband or wife will feel much more comfortable and open about his infidelity related behaviors making them easier for you to... witness.

You could stay in a motel nearby, rent a car (so it won't be recognizable), and stake outside the house in a disguise with binoculars.

An easier way is to [install a couple of hidden cameras around the home](#). There are hidden cameras disguised as clock radios, air purifiers, etc. They start at around \$50. Brickhouse spy tools is the most popular place for these items.

You could also hide a couple of voice activated recorders as well. If you have these items in place along with a [cell phone spy for complete espionage on all cell phone activities](#) there is no way you will not get TONS OF EVIDENCE OF INFIDELITY in the few days you are away!

[6] Way to Catch your Spouse Cheating – Send Them Flowers

Power to prove infidelity: [B]

Cost to prove infidelity with this method [B+] \$50

[Table of contents](#)

One of the most powerful ways of detecting infidelity in your relationship is using a tactic law enforcement uses to get to the truth.

It is the tactic of creating the appearance and strong belief of a situation being one certain way so if the actual truth coincides with these appearances then the cheating spouse will make their story and statements go along with this illusion. In essence you are creating a psychological scenario where the individual hangs themselves instead of you having to hang them.

Have flowers sent to your home addressed to your spouse with... an ambiguous card attached.

Make sure you are there when your husband or wife comes home and sees them.

Of course you reply you did not send them and have no idea what they are about.

If your wife or husband is cheating you should certainly be able to see an obvious reaction of guilt, worry, or panic on their faces indicating they are in fact cheating.

Here is variation on this tactic to catch cheating that does not require you to be present when the flowers arrive.

Send flowers to your spouse's workplace. *Make sure who they are from remains ambiguous.*

www.mobilephonespy.info

Instantly & Easily Find & Download a Cell Phone Spy for ANY Cell Phone

If your partner never makes mention of the flowers at all *they are most likely cheating* (Your spouse is waiting for you to say something first. That way if it was not you who sent them you don't get suspicious).

When your husband or wife calls you on the phone or says something about the flowers when they get home play dumb. Act like you have no clue what they are talking about because you never sent them flowers.

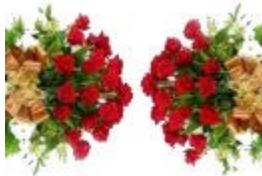

If they try to recant by saying something like '*I was just kidding*' pretending the idea that someone sent your spouse flowers was just a big joke your spouse is cheating. If they do not try to recant but seem very uncomfortable you *may* have a cheater.

[7] Way to Catch your Spouse Cheating – Another Ingenious Flowers

Power to prove infidelity: [A-]

Cost to prove infidelity with this method [B] \$70 - \$100

[Table of contents](#)

This is a brilliant twist on the previous tip on sending flowers to catch infidelity.

The original idea is to send flowers and play dumb about having any idea who sent them so you can see the facial reaction and body language on the cheating partner.

This twist to that idea is a bit more complex but even more powerful in its ability to confuse and catch your cheating wife or husband.

Here is how it works:

Send TWO sets of flowers from two different florists. Make sure they are **two totally different** arrangements. One of them is from you with a card attached clearly indicating that. The second set from the other florist gets sent anonymously with no card.

Do NOT be there when the flowers arrive. This is the key to catching the cheating bastard cold!

When you come home if your cheating wife or husband only makes mention of the set that he/she **knows you sent** then you know your spouse is hiding the second set of flowers because he/she is assuming they are from the person he/she is cheating with.

The fastest and least expensive way to send flowers is an online florist that deals with flower delivery shops right in your hometown.

The three online florists below are all very low priced with delivery in less than a day. You can get arrangements sent from any of the three as little as \$40 per arrangement,

[8] Way to Catch Your Spouse Cheating – Handheld Lie Detector

Power to prove infidelity: [A-]

Cost to prove infidelity with this method [A] \$50 - \$70

[Table of contents](#)

A HUGE PART OF ALL CHEATING AND INFIDELITY IS LYING. *There is no way a spouse can cheat on you without there being lies and lots of them on an almost daily basis.*

You have heard of [lie detectors](#) right?

Did you know you can actually get your own portable, infidelity lie detector test? It is a [hand held infidelity polygraph](#) for under \$60?

The device measures levels of stress in a person's voice. This portable lie detector tester can be attached to a cell phone so you can even detect deceit over the phone!!

What does this mean?

This means you can ask your cheating husband or wife questions over the phone and use this device, without their knowledge, to see if they are telling the truth. This inexpensive lie detector works by measuring voice vibrations when the person is telling the truth as a baseline.

Use the device over the phone with the person you suspect of cheating several times when you know they will tell the truth. This is 'remembered' by the device. Then when you ask questions they may lie about if there is a change in voice tension the portable lie detector will pick up the subtle changes in voice tension.

Another infidelity tool from [Brickhouse spy tools](#). When you get to the website enter 'lie detector' in their search box. It will be the first thing that appears in search results.

To train the Portable Voice Lie Detector to the human voice, ask your subject 3 or 4 yes/no questions and then record the voice to establish a baseline. Then ask the real yes/no questions and watch the figure on the screen.

[9] Way to Catch your Spouse cheating – Find Hidden Profiles of theirs online

Power to prove infidelity: [B+]

Cost to prove infidelity with this method [A] Free

[Table of contents](#)

An amazing website called [Spokeo](#) is a search engine that searches social networking and even dating sites for usernames.

You can use this site to **find hidden profiles your cheating wife or husband may have on youtube, twitter, dating sites, and more.**

Say, for example, your husband always uses the username *FootFanMan* for his

online accounts. He is probably going to use that username, out of habit, to create hidden profiles to talk with women he is cheating with.

Search that username and you might uncover all kinds of juicy stuff. Some of the results returned you have to upgrade (pay) to access but there are many free good results.

A tiny sample of hidden profiles you may find of your cheating husband or wife includes profiles that get found at the following sites:

- MySpace
- YouTube
- Facebook
- Match.com
- OkCupid dating
- PlentyOfFish dating
- Dozens more social related sites

When I did a search under my own usernames I have used over the past decade I was amazed at what Spokeo dug up on me.

[10] Way to Catch your Spouse Cheating – Hidden Voice Activate Recorder

Power to prove infidelity: [A]

Cost to prove infidelity with this method [B] \$100-\$125

[Table of contents](#)

Affix a voice activated audio recorder somewhere hidden inside your spouse or lover's car.

A voice activated recorder for catching a cheating spouse is very small in design and easy to hide.

Because they only turn on when there are voices the amount of recorded and incriminating data you can acquire is huge!

The voice activated recorders at [Brickhouse spy tools](#) can record over 2,000 hrs of conversations and they are design with very long, extended battery life.

Remember these only come on when there is sufficient noise to activate them like conversations.

This means a LOT of voice recording time. ***If your spouse is cheating you will most likely catch it in the voice recordings.***

Because they are so small you can place a couple in different locations where you might be able to catch juicy and incriminating conversations like in your cheating spouse's vehicle, at their work, etc.

Here are the features of these voice recorders that make them appealing and effective for catching infidelity:

- CD Quality Audio/Time/Date Stamping for easy review
- Auto File/Folder Advance for recording telephone calls unattended
- Longer Battery Life- 17 hours of continuous recording on one set of batteries

When you get to → [Brickhouse's spy tools web site](#) ← enter 'voice activated audio recorders' in the search box and it will come right up.

[11] Way to Catch your Spouse Cheating – Semen Detection Kit

Power to prove infidelity: [A]

Cost to prove infidelity with this method [A] \$50-\$60

[Table of contents](#)

The [CheckMate Semen Detection Test Kit](#) is the easiest and most cost effective way to put an end to the nightmare of suspicion and doubt caused by the infidelity of a cheating spouse.

Quickly, easily, and *accurately detect and identify semen in undergarments in 5 minutes or less*. This works whether the cheater is a man or women. When you get to the site enter “*semen kit*” into their search box to bring it up.

How to use this to detect cheating wife/woman:

After sexual activity, all women experience “Flowback.” This “Flowback” causes a woman to have dried and or invisible traces of semen in her undergarments long after every sexual encounter.

Is that a semen stain in her underwear?

Find out in 5 minutes or less with this kit. Typically, a woman will continue to secrete small amounts of semen for up to 72 hours after intercourse. Even after showering! If you think she is “cheating,” this is the easiest and fastest way to find out, what’s really going on in your relationship.

How to use this to detect cheating husband/man:

A man continues to secrete small amounts of semen for up to 2 hours or more after each sexual encounter. Long after he has sex, a man will have dried/invisible traces of semen in his underwear.

www.mobilephonespy.info

Even if a man uses a condom during sexual intercourse or even if he only engages in oral sex, there will still be traces of semen in his underwear.

[12] Way to Catch your Spouse Cheating – Fake CallerID Name and Number

Power to prove infidelity: [B]

Cost to prove infidelity with this method [A] \$30-\$40

[Table of contents](#)

There is a service called [phone spoof card](#) that lets you call anyone making their caller ID say any phone number and name you want.

When I say you can make their name and callerID say anything I literally mean ANYTHING.

(I called my cell phone from my home phone spoofing a police dept number and the caller ID said that police dept name and that police dept phone number).

The power of this for catching a cheating spouse or partner is absolutely mind boggling!

It is up to you and your imagination how you can put this to good use to catch your spouse's infidelity.

One idea is call them when you are sure they are with their secret lover. Normally if you call your spouse would see your phone number and either not answer or tell his secret lover to be quiet because you are calling, etc.

By faking his caller ID to be the cheaters best friend or someone you know he would answer freely for you might hear sounds, voices in the background to give you more clues OR if you get a hold of a suspicious phone number you think may be the person your spouse is cheating with call them spoofing your husband or wife's phone number and see if you hear 'hi honey' from the person who answers!

This [SpooferCard service](#) also lets you change your voice even to a different sex and record all the calls you want as well. What makes this catch cheating tool so powerful is the versatility of how it can be used.

[13] Way to Catch your Spouse Cheating – Read Deleted Cell Phone Text Messages

Power to prove infidelity: [B]

Cost to prove infidelity with this method [B] \$30-\$40

[Table of contents](#)

This is another brilliant piece of spying and catch cheating technology by [Brickhouse Spy Tools](#).

If you think your husband or wife is texting their secret lover there is a tool you can use to view text messages your spouse has sent and received even if he or she deleted them.

This tool is a great idea if for some reason the potential cheaters cell phone is not compatible with a [cell phone spy app](#) which infinitely has more powers for spy on a cell phone than this SIM card reader but this device is a good substitute.

Deleted details remain on the phones SIM card which is similar to a computers hard drive even after the user deleted them. It is the history of the cell phone. Cell phone spy, not to be confused with a [software cell phone spy](#), is a tool which is... about the size of a cigarette lighter.

You take the SIM card out of the cell phone (instructions are given with the product), insert it into the cell phone spy, insert the cell phone spy into any computers USB port, and a built in software utility loads which lets you view all his text messages and even your cheating spouses complete phone book from the cell phone.

Here is a simple diagram showing how this works.

[14] Way to Catch your Spouse Cheating – Hidden Spy Cameras

Power to prove infidelity: [A]

Cost to prove infidelity with this method [B] \$70-\$300

[Table of contents](#)

Install hidden spy devices around the home if you think it is possible your spouse brings their secret lover to the home or if you think hidden cameras or microphones will catch anything worthwhile.

[Brickhouse spy tools](#) has all kinds of spy equipment at very affordable prices. There are voice activated recorders, hidden cameras, GPS trackers, and lots of other tools to catch a cheating husband or wife.

The hidden cameras available now to catch infidelity and cheating spouses are amazing.

There are hidden cameras disguised as innocent household object your cheating spouse will never in a million year know is a hidden camera such as clock radios, air purifiers, smoke detectors.

There are even hidden cameras that have night vision technology so even if the rooms is pitch black you will capture all the activities of your cheating husband or wife and their secret lover.

Here are a few images of different types of hidden cameras available.

[15] Way to Catch your Spouse Cheating – Professional Call Lookup and Trace

Power to prove infidelity: [B+]

Cost to prove infidelity with this method [A] \$40-\$50

[Table of contents](#)

Do you get hangup calls at the home phone?

If there are suspicious phone numbers on either the home phone or your spouse's cell phone you can do a reverse phone trace which will show you the exact owner of that phone number and perhaps reveal your cheaters secret lover.

If the suspicious phone numbers are coming from a home phone you will even see the address even if it is an unlisted number.

There are free phone lookups online such as [whitepages](#) but these are pretty worthless because the databases are so outdated because they are free.

A [professionally powered phone lookup tool](#) will show you all kinds of information on the offending callers which may be the secret lover you cheating husband or wife is cheating with.

Information you will have access to include:

- Name of the phone numbers owner
- Address of the phone numbers owner
- Phone carrier
- Public records of the phone numbers owner
- Satellite imagery of the persons location

Works on

- Land lines
- Cell phones
- non published numbers
- unlisted phone numbers

One trick many people do not know about is going to Google search engine and typing in the phone numbers. You may be very surprised to see the information you get with this method.

Web Sites, Resources, and Tools to help your Catch Cheating Spouse

[Table of contents](#)

[Mobile Phone Spying](#) – As mentioned earlier this is probably your most powerful tool for catching infidelity in record time.

This website is the #1 place to go to learn more about spying on a mobile phone. They list and review pretty much every single mobile phone spy that exists from as low as \$15 all the way up to \$350 and anywhere in between depending upon what features you want in a phone spy.

Here is a list of every single mobile phone spy web site worth looking at:

- [SpyBubble](#)
- [SpouseSpy](#)
- [MobileSpy](#)
- [PhoneBeagle](#)
- [CellControl](#) if you can't get a hold of the cell phone you want to spy on to install the spy software.
- [Spyera](#)
- [CellPhoneRecon](#)
- [Flexispy](#)
- [PhoneSheriff](#) lets you spy on AND CONTROL a cell phone.

[Tricks to Catch Cheater](#) – this is a good website all about catching cheating and infidelity which contains a variety of good articles and tips on catching infidelity.
